CATALOGUES MAILED FREE.

### Please do not fail to read all below.

Terms, Conditions, Shipping Etc.

CASH (by Draft, Money Order or Registered Letter) with order will secure prompt filling. No goods shipped unless Cash or Satts-FACTORY SECURITY accompanies the order.

Goods will not be shipped C. O. D.

Orders for less than \$2 will not be filled unless 25 cents are allowed to pay the cost of packing.

At prices named, goods are carefully packed in moss or straw, well bailed or boxed and delivered to forwarders here, after which my responsibility ceases, except for mistakes in filling, which must be reported within five days after receipt of goods, to admit adjustment. Be careful in unpacking to note everything, and immediately "heat in" in moist soil till planted, or plant at once, never allow the roots to dry, or failure will most likely result.

It is always better to ship by Express, unless the amount of stock is large. If money is sent to prepay express or freight, I can save customers money by prepaying, as I get special rates. No prepayment is made unless mouey is sent. This is an accommodation I cheerfully do my customers, but I cannot prepay out of my own pocket, trusting everyone to return my money. Good customers never ask it. In case a surplus of money is sent, it is promptly returned with statement.

Give explicit Directions for Shipment.

When such are not given I shall use my best judgement in selecting a route, but will not be responsible for loss theroby.

Customers will generally be most successful in getting desirable assortments by leaving the selection in part, at least, to me, as I have much experience in testing and growing for all. It is the province of the Traveling Tree market, but I desire everyone to have his or Peddter to supply these rare novelties. They her choice as near as possible.

It is to my own interest to give customers the best terms and selections possible. But I cannot prevent Drouth, Severe Winter, Early or Late Frosts, Insects, Rabbits etc. From eating, nor Plants from dying by Bad Treatment in Other Hands, hence I never insure trees to

live after leaving my possession, but do deliver good stock, in good order, true to name. In case I fail in these 1 replace or refund mon-

Lam responsible to all my enstoners, and to them only: for the character of the goods, and to the same or their forwarders, the express or railway companies. I guarantee to deliver stock in good order and TRUE TO NAME, with such delivery my responsibility ceases.

Should any Trees, Plants or Seed be desired. not mentioned in this catalogue, I will be glad to Turnish same at the lowest prices. As 1 am transacting business with the largest nurseries, florists and seedhouses, 1 am in a position to furnish them at reduced prices,

### WHOLESALE.

Nurserymen and large planters, who need Trees, Plants and Roses in large quantities should write for my wholesale List. I can furnish extra good nurserystock, Freight Prepaid to any depot in Texas, cheaper than others.

### KEEP IN MIND.

That I will give a large discount for large plantings for Churches, Schools and Graveyards. Write for prices,

### CAUTION.

I employ no traveling agents. Those claiming to be my agents are frands and should be shunned.

I have no "Tree of Grapevine, Blackberries, Raspberries, Currents, Gooseberries, Tomatoes, Strawberries," no "Neverfailing Almond Trees," nor any other impossible horticultural wonders, such as, "whole-root grafted" trees, which are only the poorest piece grafted after claim exclusive right to such trade, and I freely grant their claims,

I pay no transportation charges on trees or plants, but always add some articles to partly cover them.

Address: OTTO LOCKE, Nurseryman, New Braunfels, Texas.

# SOMETHING NEW.

# BISMARCK ....

The Most Wonderful Apple of the Age.

The Youngest Bearer Ever Known.

Bears at Two Years-Never Fails.

A FINE WINTER APPLE. HARDY AS AN OAK.
SUITABLE FOR ALL LATITUDES.

# ... The Bismarck Apple. ...

Read the following reliable evidence of its value:

HHS fine new apple comes from New Zealand, and it is creating greater interest among apple growers than any other Not only here, but all over variety. Europe. It is a fruit of large size, specimens having been grown, it is claimed, of nearly two pounds each. Color, a deep orange yellow, shading to a bronzy red, and very attractive. Flesh yellow, tender and juicy, and of good quality. Keeps all winter. It has been fully tested in Russia, Germany, France, England, United States and Canada, and wherever grown has proved a most astonishing revelation in hardiness and early fruiting.

The following from the London Gardner's Chronicle of October 18, 1895, shows its productiveness:

"Now we have to speak of another apple called "Bismarck." It furnishes an instance of precocious heavy bearing that we do not remember to have seen equaled. Eighteen rods and a half were covered with Bismarck trees of two years old upon the Doucin stock. Many of these had eleven, a few twelve, large fruits upon them, and some had none. The trees are planted in nursery rows about three feet apart, and the plants about a foot asunder. An acre of trees cropped in such a manner would yield about five hundred bushels of fruit per acre. This is a wonderful showing for a new fruit, which is destined to become a universal favorite."

What the *Gardner's Chronicle* says of its productiveness, is confirmed by experience in this country, as on a transplanted two-year Standard tree was counted *twenty-six* handsome apples, showing what a wonder it is.

Prices: strong, 4 to 6 feet trees, grafted on whole roots, 15 cents; \$10 per 100.

Striped June. (Red Margaret,) medium to large size, yellow, striped with dark red, juiey, subacid, valuable. May.

Red June, medlum to large, oblong, dark red, erisp, sometimes almost mealy tender, high flavored. Ripe June 5, and sometimes until July.

Red Astrachan, large size, crimson and yellow, juicy, crisp, valuable for cooking. Tree a fine grower and very prolifie. June 1 to July 15. Springdale, a new seedling. Took first preminm

Yellow Transparent, Russian varlety, medium, pale yellow, early.

Early Harvest, large, yellow, tender, juley, and of excellent quality. July 1.

Yellow Horse, known throughout the South as the best all-purpose summer apple, large, yellow, sometimes with red blush, firm, splendid for cooking, eating and drying. July 15,

Fall Queen, tree upright, spreading and long- Bismark, this most valuable new apple, introlived, fruit large, yellow, with bright, red cheeks, very rich and juiey. Sept. and Oct.

Lady Finger, large, oblong, greenish yellow, covered with deep earmine, tender and juiey.

Rome Beauty, vigorous, profuse, striped, large, good market,

Kinnaird's Choice, fruit medium, mostly covered wite a dark red; flesh yellow, tender, juiey and very aromatie. Very hardy and pro-

Winesap, tree a strong grower and productive,

fruit of medium size, red flesh, erisp, juiey, high flavored, valuable for table, market and cider, Ripe in Oct.

Black Twig, tree upright grower, fruit like Winesap but one fourth larger.

Ben Davis, every one has seen this apple, as it is sold by grocers in fall and winter; large, red and yellow striped, subacid, valuable. October.

at Ark. State Fair. Our best keeper and will sell, when known, above all others. Fine grower, absolutely ironelad, heavy bearer. Fine deep red color, excellent quality, and a splendid keeper, Price 25 ets. each.

Herschal Cox, a new winter apple from Tenn. Fruit and tree resemble Ben Davis but fruit smaller, better quality and better keeper. Price 25 ets.

duced from New Zealand, promises to take the place of almost every other apple grown in this country. Wherever grown it has proved a most astonishing revelation, not only in high quality, but also In hardiness and especially in earliness of fruiting; it is just the apple for a hot elimate. The eolor of the fruit is a beautiful golden yellow and its size is of the largest, of most delicious flavor. One and two year old trees bear heavy crops of large fruits. Price 50 cts each.

### FIVE TEXAS APPLES.

Gray, from San Saba County. Growing besides other apples, it has been watched and compared with them, and its many merits make it sought and demanded by all who have seen it. Price 35 ets.

Lincoln, Mr. Onderdonkes favorite; he says of it: "Large and flattish, while growing resembles Rhode Island Greening, but takes a dull red blush just before ripening. Our best apple." August. 35 ets.

ed in Williamson county thirty five years ago by Capt. W. P. Rutledge. It is considered one of the largest apple trees in the State, measuring over 50 feet across the top. Bears, a fair crop of medium sized fruit almost every year; very promising. Fall. 35 cts.

Talbot, the Apple for this Section, originated in Williamson county, grows anywhere: strong,

vigorous growing tree, our burning sun seems to have no injurious effect upon it, as the branches do not lean to the north when young, like those of most other varieties. Trees made double the growth of any other in young orchards; they do not overcrop, but bear regularly. Fruit medium to large, greenish yellow, nearly overspread with red, flesh rich, cream color, of fine texture, firm, very juicy and deliciously flavored. Ripens in Sept. and keeps until January. 35 cts.

Rutledge, one of a number of apple trees plant- Heine, originated in Burnet county. Tree a good grower and regular bearer. Fruit large to very large, oblong, depressed at one end, beautiful yellow with slight blush where exposed to the sun, flesh firm, white of an excellent quality. Ripens in September and keeps till January, 35 ets.

One tree each of the five Texas apples, for \$1.50.

## Crab Apples.

These pretty little apples do well on almost any kind of land. Often we have seen them growing to perfection when other apptes failed entirely. Price: 15 cents each.

Hyslop, vigorons, prolific, crimson, large ornamental, preserve.

Transcendant, (Siberian,) an attractive yellow Yates, bright red covered with white specks; color, splashed and striped with red; bears very young and annual crops thereafter. We

value it highly for preserves. Buds and blossoms exquisitely beautiful. Ripeus in July.

quality fine, very productive, long keeper. This is one of the best apples known.

In order of ripening, 25 cents each; \$2.25 per 12; \$15 per 100. Extra targe, 6 to 7 feet, 50 cents each.

Wilder Early, (new,) vigorous and hardy, extra early, no rotting at the core, superior quality, melting, rich and pleasant.

Koonce, (new) verp early, of the very best quality, do not rot at the core. The

fauit is of a straw color with red cheek and brown dots. Tree of vigorous growth, healthy, and is very hardy in bud and bloom, so that late frosts will not kill the blossoms, 35 cents each.

Clapp's Favorite, on pear or quince, prolific, red cheek, large, excellent, table.

Reliance, (new.) medium size, brown red with russet, flesh fine grained, juiey, melting, high flavored; quality very good to best; tree er. 35 ets,

Summer Beauty, raised In 1873 and introduced In 1893 by ns. and the surest bearer of all varieties that not do well in your region. Very truly, ever have been tested so far south. The trees

have not failed to produce heavy crops every year since 1880. It is a vigorous, symmetrical grower and late bloomer, so that spring frosts will not injure it. The fruit is very large and handsome, yellow with a fine bright red cheek, flavor sweet, sugary, rich aromatic and pleasant, excellent quality; always grown in clusters of from three to five. One of the rarest and most productive pears in cultivation. Ripening the end of July. Price of well rooted one year old trees, 2 to 3 feet, 50 cents. 4 to 6 feet, \$1.00 each.

The following are a few testimonials of the \* Summer Beauty from persons who have examined and tasted the pear.

Washington, D. C. August 14th, 1890. Mr. Otto Locke, New Braunfels, Tex.

Dear Sir: The box of pears which you sent vigorous and a regular and abundant bear- were duly received. If you can grow such Pears as this as far sonth as your location in Texas, that there is no need of growing the Le This pear is the finest fruit Conte, or of it ever being said that pears will

H. E. Van Deman, Pomologist.

U. S. DEPARTMENT OF AGRICULTURE, Division of Pomology,

Washington, D. C. August 13th, 1894. Mr. Otto Locke, New Braunfels, Tex.

Dear Sir: Your specimens of Summer Beauty Pears and accompanying letter received, August 7, for which accept my thanks. I consider it a very valuable pear for your section of the country and perhaps might succeed equally well elsewhere. It is of tine flavor, sweet, sugary, rich, slightly granular and excepting a slight astringency which may result from the pears having been taken from the tree at too early a date, would rank very high amongst pears. It has colored up beautifully and should be a valuable market variety.

Yours truly, S. B. Heiges, Pomologist.

Little Silver, N. J., Aug. 15th, 1893. Mr. Otto Locke, New Braunfels, Tex.

My dear Sir: The specimens of Summer Beauty pears which you sent on the 8th inst. have arrived in good condition, proving, it to be a remarkably fine shipping variety. It is certainly a highly colored and attractive fruit and although a little astringent, I find it sweet and rich; the flesh of fine texture, thus placing it far above the average Southern Pears in point of quality. Its size too is good. Am quite sure it is distinct from anything before the public, and think the name given it an appropriate one. Yours truly,

J. T. Lovett.

Zan Autonio, 2 Angujt, 1893.

Werther Berr Lode! Bir find herrn E. Lode verpflichtet für Bufendung eines Riftdens mit Lirnen bon einer Corte, die er febr paffend "Summer Beauty" getauft hat. Diefelben baben den Ramen nicht nur durch ihre bubiche Form und prächtige rothe garbung, fondern auch durch Uroma und Wohlgeschmad. 28. A. Trendman.

Flemish Beauty, large, beautiful, juiey, melting Hubbard, Japan pear, vigorous in growth and rich and tirm, does well here.

Bartlett, on pear or quince, prolific, yellow, Japan Wonder, another Japan pear of great large, fine, table, market.

Howell, large, waxen, yellow with red cheeks,

rich, buttery, sweet and perfumed, strong grower, productive and valuable.

Smith's Hybrid, (new,) trees resemble Le Conte, fruit earlier, larger, richer and more melting, one of the best new pears.

Le Conte, on own roots, profific, yellow, very large, good table or market.

Jefferson, above medimn, shape pyrlform, color yellow with deep crimson cheeks, good market pear.

Lawson, one of the most beautiful when fully ripe a brilliant crimson, on a clear yellow ground; flesh is rich, juicy and pleasant.

Seckel, on pear, prolific, brown, small, best, table.

Duchess, pale yellow, very large, good market. Buffum, medium size, yellow, somewhat covered with reddish brown and russet, buttery, sweet and excellent.

Idaho, (new) very large, flesh white, tender, sweet and buttery, with a richer and finer flavor than the Bartlet, ripe late.

Vicar of Winkfield, tree a vigorous grower, fruit large, pale yellow, red check, good tlavor.

Kieffer Hybrid, very vigorous, prolific, yellow, large, excellent, good table and canning.

Garber Hybrid, (new) oriental strain, like the Smith's, fruit resembles the Kieffer in slze, shape and color, ripe three weeks later.

Lincoln Coreless, almost without core or seed, unusually large, rich golden color when ripe, excellent quality, keeps perfectly sound until March, 35 ets.

Winter Nelis, medium, buttery, good flavor, slender, straggling grower.

Beurre Eastern, large, melting, very good, ripens in Nov, and ean be kept until spring.

Hawaii, medium round, bergamot shape, very prolifie: foliage luxuriant, fine tree, 35 ets.

Mme. Von Seibold, large, round, russet, similar in shape to the China Sand Pear. Flesh brittle, juicy, with a peculiar spicy aroma. Prolific and good grower. 35 cts.

Golden Russet, Japan, the fruit is flat or apple shape of good size and golden russet color; the tree is a quick grower and sure bearer.

adapted well to our climate, 35 cts.

merit; the tree is of vigorous and luxuriant growth, well worth planting. 35 cts. each.

Need very rich, deep, well drained Soil. 25 cents each; \$2.50 per 12.

Orange, old standard variety. Champion, (new) very fine, large.

Meoche's, (new) very fine and prolific.

### - Almomds. 🛹

25 cents each. Almonds do well wherever the Apricol thrives. They succeed in Western Texas.

Languedoc, Princess and Sultana are the three best varieties.

In order of ripening, 25 cents each; \$2.25 per 12.

color, good, prolifie.

Eureka, very early, large, fine, prolific. Blendheim, Russian, large, golden yellow, with

a red eheek, good quality, bears well. Moorpark, large, excellent; an old favorite. Chinese, the largest of all apricots.

Myer's Early, earliest; medium size, of white JAPAN APRICOT, Bungoume, this is remarkable for size, fine quality and vigorous tree. 35 ets.

Cluster, original tree has never failed to bear sinec it was 3 years old; of beautiful, symmetrical growth, very vigorous and hardy: an enormons bearer. Fruit medium, transparent yellow, excellent quality.

### Nectarines.

25 cents each, unless otherwise noted.

Jumbo, originated in Burnet Co. from a peach seed. Fruit sald to be as large as a Chinese cling peach: rich yellow; delicious flavor; Coosa, very large, red, flesh white; a nep seed-

sure bearer, 50 cents each.

and mottling of red; sweet and a peculiar pleasant flavor, Freestone.

ling from upper Georgia.

Boston, large, deep yellow, with a bright blush Victoria, medium, purple, brown cheek, July,

25 cents each.

Early Richmond, an old reliable variety.

English Morello, similar to Early Richmond, Govenor Wood, large, heart shaped, light yellater.

May Duke, very fine, heart shaped, nearly Black Tartarian, very large, purplish black. black, tender rich and juicy.

Esel Kirsche, a Germen variety. Size medium, color bright red, mild acid flavor, good

grower.

low shaded with red, juicy and sweet. May.

half tender, flavor mild and pleasant. Tree remarkably vigorous, erect, beautiful grower and very popular. May and June,

# Peaches.

In order of ripening, 4 to 6 feet, 15 cents each; \$10 per 100.

I. RIPENING HERE FROM MAY 20TH TO JUNE 10.

Sneed, (new.) ripe 10 days before Alexander, of Chinese type. Tree of vigorous growth and drooping habit. The earliest peach in cultivation.

Triumph, (new.) "The earliest yellow peach

in the world." A perfect yellow freestone, of excellent quality. Ripens with Alexander. A good keeper, very proliffe. Two year old trees bore one half bushel each. 25 cts each. Greensboro, (new.) earlier and larger than Alexander, fine flavor, and attractive appearance. Mr. J. Van Lindley says the Triumph is a great improvement over the Alexander,

Greensboro will make it a leading as well as a great market peach. 25 cents each.

Dwarf Japan Blood, early, abundant, early bearer, red, good, new.

Alexander, good quality, high color, flesh greenish white.

Arkansas Traveler, better than Alexander.

Jessie Kerr, originated from seed of Hales, Early; about the size and season with Alexander, bears well.

Love All, large, globular, dark red cheek, very juicy and sweet, ripe with Alexander.

Bokara, (new,) the hardiest peach known. It is of fine quality and a good bearer. 25 cts.

Honey, medium size, oblong, pointed, very sweet, bears well, an early bloomer.

H. Ripening from June 5th to 20th.

Red River, original in Denison, Texas, large. good, white, prolific.

but that the greater size and beauty of the Southern Early, (new.) this is the largest of all

early peaches, good quality, very prolific. 25 ets. each.

Poarson, similar to Mamie Rose, but as large as Chinese Cling. A perfect freestone, ripe before Mamie Rose. It is a hardy, prolific and very valuable new peach, 25 cts, each,

June Rose, large red cheek, white flesh, one of the best early varieties.

Mamie Rose, a seedling of Chinese Cling. Fruit very large, white, nearly covered with delicate carmine; flesh white, juicy and of good quality, a regular and very prolific bearer.

Rogers, extra large, red cheek, juicy, aromatic. sure, prolific. A seedling of Chinese Cling and one of our best peaches.

Yellow Mystery, (new.) yellow freestone, early, good.

Ameliaberta, (new,) a cross between Amelia and Elberta, as large as Elberta, higher color, and ripens with Amelia, freestone, 25 cts.

Aurora, very large, globular, red check to the sunny side, juiey and of good flavor, bears well. A fine new peach, freestone, 25 ets.

Cleveland Free, a seedling of Thurber, Fruit large, creamy white, red cheek, juicy, rich and excellent.

III. RIPENING JUNE 20TH TO JULY 15TH.

Mountain Rose, large, round, white flesh, red cheek, free,

Beauty Blush, new, fruit uniformly large, high color; splendid for market, freestone, 25 ets. Pallas, large, flesh white, melting, with a rich

vinous aroma, profase annual bearer. Gen. Taylor, large, white flesh, red check, Lemon Free, light yellow flesh, melting, a large

cling, productive. Gen. R. E. Lee, cling, similar to Chinese Cling,

but earlier and more prolific, Barnard, large, yellow, red cheek, very pro-

ductive, freestone. Crosby, medium, fine rich yellow color with streaks and shades of carmine.

Comal Cling, (new,) the best, largest and finest yellow clingstone. The original tree was found growing behin I an old house by one of my neighbors ten years ago. Fruit very large, dark yellow, with dark red cheeks to the sunny side, flesh yellow, juicy and sweet. Trees growing to a large size. Leaves very large. A regular bearer, 25 cts.

IV. RIPENING JULY 15TH TO AUGUST 10TH. Carpenters Cling, large white, with a tinge of red, sweet, juicy, very productive,

Old Mixon Free, large, white flesh, red cheeks, tine, prolific.

Elberta, very large, yellow, red cheek, free, firm, sure, prolific. Best of all.

Pratt, very sweet, yellow, red cheek, large. A fine good peach.

Old Mixon Cling, large, white flesh, red cheeks. prolitic.

Chilow, a large yellow peach like Elberta. but a clingstone. Originated near Austin. A good bearer and shipper; new. 25 ets. each.

Thurber, very large, white flesh, red cheek, sure productive.

Dr. Berckmans, (new,) a seedling of Chinese Cling. Size large, creamy white, with blush cheek; flesh white, red to the stone; melting, juicy, vinous and of highest flavor, freestone. 50 cts, each.

Lemon Cling, large, yellow, sure, a fine peach. Wilkins Cling, large, white, red cheek, good quality, productive, clingstone.

V. RIPENING FROM AUG. 10th to Sept. 1st. Indian Free, large, globular, red, melting, rich, sure productive, a good late peach, 25 cts.

Ward's Late, large, globular, white, red cheek, very good, prolific.

Heath Cling, very productive. One of the best clingstones.

inm, good bearer, very fine for shade tree. 10 cts. each: \$8 per 100: 6 to 7 feet, 25 cts.

Sweet Botan, Japanese, vigorous, purple, large. prolific, one of the best.

Hattankin No. 1, Japanese, early, yellow, delicious flavor, very large.

Everbearing Plum, new, Chickasaw, medium, red, meaty, juicy; tree a strong grower. This plum produces ripe fruit for nearly three months, begin to ripe in June and keep on ripening to the end of August. 50 ets each.

Baily. Japanese: new, very large, globular, cherry-red color, prolific bearer.

Normand's Japan, Japanese; new, beautiful golden color, larger and better than Burbank, apple shape; ripe end of June.

Robinson, Chickasaw, large, blood red, bears young, very prolitic.

Burbank, Japanese, seedling of Satsuma, better bearer and much timer fruit, extra large, Unknown, came without a lable. purple skin, one of the best.

Wickson, new, Japanese, tree grows in vase Yone Momo. form, sturdy and upright, very productive. Wasse Sumomo, said to be very early. The fruit is evenly distributed all over the Wasse Botankio. tree, it changes to white when about half Nagate No Botankio, early, grown and remains so until a few days before Sagetsuna. ripening when it changes to a glowing carmine. Small stone, the flesh is of fine texture firm, sugary and delicious, and will keep two Hytan Kayo. weeks after ripening. A fine rare plum, 50 ets.

Red Japan, Japanese, large, red, good, prolifie. enormous bearer.

Chabot, Japanese, large, carmine red; flesh yellow and solid, very productive.

Satsuma. Japanese, largest size, dark blood red tlesh, prolific.

very large, excellent, prolific.

Wayland, Golden Beauty type, vigorous, crimson, medium, good, firm, very prolific, best late plum in cultivation.

### NEW PLUMS.

Price, 50 cents each; \$5 per 12.

Marianna, like Decaradeuc, vigorous, red, med- White Kelsey, this is a duplicate in size and shape of the common Kelsey, except it is of a pale, creamy color, almost white when ripe: does not rot before maturity like the Kelsey, and much earlier to ripen and later to bloom. Fruit of delicious flavor.

Yedo, much like the White Kelsey, which it resembles in some respect, but it is of a deeper yellow color and ten days later to ripen, and a very attractive, fine flavored plum.

Mikado, a very large plum, of greenish yellow color, nearly round, very little sature, a rapid grower, more so than any other. This is the most remarkable of all plants for its enormons size, beauty and good quality; It is probably the largest plum in existence: ripeus fifteen days after Yedo.

The following eleven varieties were lately imported from Japan and were highly recommanded from a reliable source.

0- Hatankyo, said to be early.

Hausmomo.

Wassu.

Weeping Blood Plum, this variety said to produce a blood red plum of good quality. The trees grow of a weeping habit like a Weeping Mulberry.

One tree each of these 14 varieties for \$6.00.

# Blackberries.

In succession.

MAYES DEWBERRY, (like cut,) new, very large, early, glossy black, highly flavored. It roots deep, is very prolific and never fails. Price, 50 cents per 12: \$3 per 100.

White Dewberry, ripe 14 days before Mayes, a good, sweet berry. 50 cents per 12,

Dallas, very vigorous, drooping, thorny, productive, large, fine. 50 eents per 12: \$2.50 per 100: \$12 per 1000.

We have a large stock of Evergreens, varying from 8 inches to 5 feet in hight; also Roses, Gladiolis, Cannas, and can furnish any named variety of Cacti at low Prices.

THE WICKSON PLUM.

A Grand Plum, both in Size and Quality. Immensely Productive.

# THE WICKSON PLUM.

The earliest Bearer, most vigorous Grower, most free from Disease and Insects, most valuable Plum known for home use and the market.

Luther Burbank, the originator of the Burbank Plum, and the most noted authority on Plums, says of the Wickson: "Among the many thousand Japanese Plums which I have fruited, this one stands preeminent in its rare combination of good qualities. The tree grows in vase form, sturdy and upright, yet as gracefully branched as could be desired. From the time it is half grown, until a few days before ripening, the fruit is of pearly white color, which changes to a glowing carmine, with a heavy white bloom when ripe. The stone is small and the flesh of fine texture, firm, sugary and delicious, and will keep two weeks or more after ripening; or can be picked when hard and white, and will color and ripen almost as well as if left on the tree. A year ago I was convinced that this was the best of all the Japan Plums, and have yet no reason to change that opinion, only more than ever to admire its growth, its productiveness, and the rare beauty and keeping qualities of its fruit, and its size and quality."

From W. A. Taylor, Asst. Pomologist, Washington, D. C.: "Specimens of Wickson duly received. This is certainly a handsome Plum and of good quality also."

From S. D. Willard, Geneva, N. Y.: "Your new Plum, Wickson, received in good order as if fresh picked from the tree (shipped 1000 miles). I can say it is excellent, and would seem to be the best of its class."

From M. Crawford, Ohio: "The new Japan Seedling Plum you kindly sent me was received in perfect condition. It was tasted by several of us, and all pronounced it very delicious."

From Experiment Station, University of California: "Thanks for your letter and specimens. The Plum is grand."

From Prof. L. H. Bailey, Ithaca, N. Y.: "These Japan Plums are certainly the coming fruit."

The Wickson stands at the head of the Plum family. It is proving remarkably successful the country over. No other Plum ever became so popular in so short a time. This is because it is practically curculio proof and free from black knot. It is proving a money maker in all sections.

### Strawberries.

25 cents per 12; \$1 per 100; \$5 per 1000.

of all: large, vigorous, perfect flower, a tine pollinator for other kinds.

Red Cedar, one of the best evergreens, 11 to 2 feet, 25 cts: 3 to 4 feet, 50 cts.

Cupressus Pyramidalis, this is a beautiful, tall, columnar evergreen, does well in Texas, a little tender in far north. I to 2 Feet. 25 ets: 2 to 3 feet, 50 ets. Cupressus Horizontalis, like above, of rapid

growth, but branches spreading. 2 to 3 feet,

Strong, Open ground.

One year, 25 cents; \$2.50 per 12. Two years, extra strong, 35 cents each; \$3 per 12.

These plants have been blooming profusely all the season, and their description carefully noted. No better list, including the same number of varieties, can be made. Such plants ordinarily sell at 50 cents each. They are not to be compared with the delicate and sickly pot plants, finger-length high, sent out by many propogating houses at cheap rates, the majority of which die in transplanting to open ground. I have the largest stock of field grown Roses in West Texas,

### EVERBLOOMING.

Agrippina, rich, velvety crimson, a free bloomer and grand bedder.

American Beauty, dark, rich crimson, exquisite shade, large flowers.

Belle Siebrecht, a solid pink of the richest

large and well formed. It is a free bloomer with large and glossy foliage, 35 cts,

Bridesmaid, pink, strong grower, handsome l'oliage, a favorite.

The Bride, strong, healthy, large, double, fine bnd, white, with delicate carmine blush.

Camoens, China rose with yellow base of petals, sometimes striped with white; medium size, nearly full, sweet and free flowering.

Countess Anna Thun, a strong, bushy grower. The flowers are of extra-size and beautiful form, color a rich orange salmon, shaded to silvery pink.

shade. The flowers are sweetly perfumed. Champion of the World, a remarkable new sort

which combines the most desirable qualities. It is a perpetual bloomer, summer and winter. The flowers, which are produced in the of perfect shape: they are of a deep, rosy pink and delightfully fragrant. 35 ets. each.

Countess Riza du Parc. China rose; base of petlar, very sweet. One of the best.

Catharina Mermet, vigorous, large, full, bright Mad. Lambard, a tirst class rose for bedding: flesh color, very sweet, center rosy flesh.

Chlothilde Supert, Polyantha Rose, pearl white, very double and sweet.

Charles Darwin, brownish crimson, shaded violet, tine in autumn. 35 cts.

Douglass, dark cherry red, rich velvety, large and full; one of the best bloomers.

Duchess de Braband, few roses equal this in freedom of flowering; none surpass it in either fragrance or vigor; the flowers are rich and peculiarly colored; color rose, heavily shaded with amber and salmon.

Dr. Grill, a coppery yellow flower, with a fawny-rose reflex; an entirely new color, and one of great brilliance. The outer petals are large, round, shell-shaped, and enclose a mass of shorter petals of a brilliant color.

Duchess of Albany, very large, deep pink, full and highly perfumed.

Ernest Metz, a remarkably beautiful variety, and one of the best new French roses, of vigorons growth. Blooms very large and deliciously sweet, are produced singly on stiff stems. The color is tender rose, changing toward the center to vivid cherry, with a distiuct border of cherry around each petal.

Etoile de Lyon, sulphur yellow, very large, full and fine form; one of the best.

Franziska Krager, color deep copper yellow; the flower, when open is of good size and very symmetrical. One of the finest roses to plant in masses and clumps.

Gen. Jacqueminot, crimson, large and full, strong grower, hardy, free bloomer.

Hermosa, clear rose, medium, full, hardy, free bloomer.

Henry M. Stanley, new, a rare shade of amber rose, delicately tinged with apricot-yellow towards the center, A beautiful rose, 35 ets.

ivory white, fine buds and fine flowers. A splendid grower.

La France, strong, upright, very large, full, Pink Soupert, new Polyantha rose. The flowdelicate pink, sweet, profuse.

Louis Richard, a coppery rose, beautifully tinted with lilae, free bloomer; one of the best. 35 cents each,

Louis Phillippe, rich, dark velvety crimson. profuse bloomer, good form.

Mad. Elie Lambert, a rich, creamy white, tiuted pale golden yellow, center rosy flesh, cup shaped, 50 cts.

greatest profusion, are perfectly double and Mad, de Watteville, a beautiful grand new Tea. The color is a rosy-blush, widely bordered with bright crimson, deepening towards the center to orange. A pretty rose.

als coppery yellow, medium, full and globu- Mad. Hoste, ivory white, deep amber center, extra fine.

> extra large full flowers; very double and sweet; color a beautiful shade of rosy bronze. passing to salmon and fawn, beautifully shaded with carmine; an elegant rose.

> Mad. Caroline Testout, the petals are large, and of the elegant La France form, exquisitely edged and bordered with clear silver rose. Both flowers and bnds are extra large and of very elegant form; the color is brilliant satiny rose, deepening at center to clear red. One of the best new roses.

> Mad. Isaac Perioro, very hardy and a constant bloomer; it has a large beautiful foliage and is a vigorous grower; the flowers are a beantiful, vivid earmine. One of the best.

> Mme. Pellissier, a most beautiful yellow bedder; broad creamy outer petals, deepening to fine yellow in the center. Petals very large and well shaped.

> Malmaison, this is certainly one of the choicest roses and for general cultivation unsurpassed. The color is a beautiful, rich, creamy flesh, with a rose center: flowers very large, perfectly double and deliciously fragrant; a strictly first class rose in every respect.

> Marion Dingee, a grand, new rose; it is a strong vigorous grower, with thick, green leaves. The flowers are large and full, the color is of the darkest crimson, and the richest colored Tea rose; free bloomer, 35 ets.

> Marie Guillot, moderate grower, white, large, verv full, noue finer,

> Meteor, deepest crimson, large and double, a beautiful free bloomer.

> Mrs. Degraw, the color is a rich, glossy pink, hardy; a premier rose in every respect.

> Papa Gontier, tea rose, bright rosy carmine crimson, blooms are large and long, free bloomer.

Kaiserina Augusta Victoria, (11y. Tea.) pure Perle des Jardins, golden yellow, large, double, free bloomer; the finest yellow rose in cultivation.

> ers have the form of C. Soupert and in color of deep Hermosa pink. A very free bloomer: single plants under ordinary treatment, often produce fifty perfect flowers; hardy and good.

> Queen's Scarlet, rich velvety red, most profuse in bloom, hazdy.

Safrano, a bright, apricot yellow, changing to orange fawn. It is very much esteemed and a grand favorite.

Senator Mc Naughton. light yellow, fine buds and flowers, free bloomer, new.

Snow Ball, this is one of the linest pure white roses, flowers round, like a ball, very double, free bloomer; hardy and sweet.

Snow Flake, pure white: most profuse bloomer of all roses.

Souvenir de Wooten, a remarkably brilliant and striking new ever-blooming rose. The color is a beautiful shade of a carmine crimson. delicionsly fragrant, a prolific bloomer, of vigorous growth. The flowers are very large | Empress of China, flowers of medium size, from and double.

Striped La Franco, same as La France, except the color pink, with stripes through it, superb.

Susanno Blanchett, foliage large, erect and beautiful: outer petals large and broad, of a clear flesh color, inner petals shorter and of deeper shade,

Sunset, this exquisite orange yellow variety is one of the finest Tea Roses grown: the flowers are large and double.

The Queen, a most charming Tea Rose, It is pur snow-white, makes good, finely formed buds, is quite full. The petals are thick and of good substance, opens well, is very sweet. and valuable as a pure white everblooming

Triumph de Pernet Pere, magenta red, passing to rich crimson, flowers large; a free bloomer. 35 ets. each.

Vick's Caprice, a beautiful striped rose, perfectly hardy, color bright rose, distinctly striped deep carmine or crimson.

Viscountess Folkestone, always scarce: a gem among roses; very large with very large petals, color white illuminated with shell pink. 35 ets. each.

Waban, identical with Catherina Mermet, only it is deeper and richer in color.

White La France, pure white, large flower, free bloomer, strong grower.

Rugosa Alba, this fine little rose is a native of Northern Texas. The foliage is finely cut and shining as if varnished; the growth is of dwarf habit. The flowers are single of a creamy white color changing to rose, sometimes to yellow. In fall and winter the bushes are full of cherry-red rose apples, so this plant will be an ornament all the year through. 15 ets: \$1.50 per 12; \$10 per 100.

### CLIMBING ROSES,

Baltimore Belle, good climber, medium, full, in clusters, profuse in spring.

Climbing Hermosa, nearly every one is acquainted with the merits of this grand old rose.

The flowers are identical with Hermosa. from which it only differs in regards to its growth. The flowers are borne in great profusion, and in color are clear, bright pink, medium size, full and very fragrant. It is a rapid elimber and an exceedingly vigorous grower. 35 cts.

Climbing Perle, yellow, large flowers, one of the best climbing roses, hardy.

Crimson Rambler, new, the plant is of vigorous growth, the color is of the brightest crimson. The flowers are produced in great pyramidal panieles or trusses, each earrying from 20 to 40 blooms: a charming pillar rose, 50 ets.

painted buds, soft red, turning lighter as it opens. It is said to bloom from May till Dec. Introduced from China, 50 ets.

Glorie de Bijon, this grand southern rose is used as a pillar rose. It is noted for the great size of its flowers, its delieate Tea scent, and its exquisite shades of color, being a blending of amber, carmine and cream. One of the finest roses on our list, 50 ets.

Greenville or Seven Sisters, a climber of most rampant growth; immense clusters of flowers varying in color from crimson to blush white,

Golden Chain or Climbing Safrano, a beautiful pillar rose, being a strong climber, color orange yellow or deep saffran, good size, full and sweet.

Jas. Sprunt. deep crimson, large, free bloomer, a valuable rose.

Mary Washington, a hardy, perpetual blooming climber, producing large, double, snow white blossoms in great profusion from spring until frost. It is a sweet and most valuable sort. 35 ets.

Marshal Niel, beautiful deep yellow, very large, full, globular form, sweet, free bloomer; the tinest climbing rose. Budded upon Manetti. 35 eents each.

Reine Marie Henriette, glowing crimson, large and full, well formed, a strong climber.

Reine Olga de Wuertenberg, this splendid rose should be grown where the Marshal Niel succeeds. For covering verandas and trellises it has no equal. Color rosy erimson, suffised with yellow, 35 ets.

W. Allen Richardson, the coloring of this rose is simply exquisite. The base and back of the petals are a bright yellow, the center highly colored with glowing copper and rose; first class climber. Try it. 35 ets.

Wichuriana, new, the growth is creeping and therefore can be used to cover the ground, stems of trees, pillars, trelfises or any other purpose desired. They are the hardiest roses, will stand any climate, and will thrive in the

poorest soil. The foliage is finely cut, bright green, shining as if varnished and keeps in full beauty until Christmas. The flowers are single, pure white, with yellow stamens, and are produced in great profusion. 35 cts.

### MOSS ROSES.

Crimson Globe.

Glory of Moses, clear pink, very mossy bud.

Mausseline, large, full, color pure white to rosy blush: a continuous bloomer.

Zenobia, pink, large and double.

### TREE ROSES.

The TREE Roses are grafted on hardy rose stalks four to five feet high, are tree shaped, (see cut.) and when in full bloom are objects of beauty, making handsome plants for the lawn or rose border. In this shape we offer only the "Hybrid Perpetual" or hardy class. We have them in WHITE, PINK. YELLOW and CRIMSON at \$1.25 each; \$12.00 per dozen. Two colors to one stalk, Ren and White, \$1.50 cach. The annexed cut represents a Tree Rose in full bloom.

### Hardy Climbers.

ANTIGONUM LEPTOPHUS, or QUEENS WREATH, a spleudid climbing plant from central Mexico, producing rose colored flowers in racines two feet long. The profusion of bloom is such as to give the resemblance of roses at a distance, hence its name, Rosa de Montana or Mountain Rose. Will live ont in the winter anywhere in the south. The vines are killed by frost, but it quickly shoots up in the spring and develops its flowers from May until frost. This is one of the most lovely vines. 25 cts. each.

WISTERIA, a beautiful vigorous climber, that bears transplanting well. Produces large clusters of bluish purple, pea-shaped flowers. 25 cts each.

TRUMPET CREEPER, a cli ging vine of rampant growth; clings to wood or stone walls, or trees: very hardy, produces clusters of long, trumpet-shaped, orange-scarlet flowers from early spring to late fall, 10 cts.

EVERGREEN HONEYSUCKLE, strong growing, a perfect evergreen and an abundant bloomer, very fragrant, flowers open white, changing Indian Climbing Vine Root, something new, to yellow. 20 cts.

JAPAN GOLDEN HONEYSUCKLE, a beautiful evergreen vine with a dark green foliage, netted and mottled with gold, flowers white and very desirable. The leaves change to dark green and purple in winter. 25 cts.

CHINESE MATRIMONY VINE, it is a most vigorous hardy climbing plant, when trained, in any location where a hardy climber is desired. It sends out numerous side branches, so that it covers a great space in a short time, and every new vine is at once covered with bright purple flowers, which are succeeded by brilliant searlet berries nearly an inch long. The contrast between the dark green foliage and shining scarlet fruit is beautiful. 25 cts each.

PASSIFLORA, the flowers are of a blue color, 3

to 4 inches across and borne profasely at all times after vines are 3 to 4 Fet long. The numerous stamens are dark blue, with two or three rings of white near the base. It is liflicult to imagine a more lovely flower. 15 cts. each.

Passiflora, same as above, white, 25 cts. C

like an enormous sweet potato. It produces a vine which grows better in a room than outside, and the foliage not being dense, it makes a beautiful, novel and pleasing ornament for the parlor. Small yellow flowers and a fruit like a small tomato, with black stripes. Large root, 50 ets. each.

## Ornamental Grasses.

These plants are very hardy, requiring little attention. They form very large etumps; their rich, green foliage, and beautiful, enormous plumes exciling great admiration. From the plumes handsome winter bouquets can be made for house decoration. We give the height to which they grow. By using dyes the plumes may be colored any shade. My plants are strong and well rooted.

Eulalia Japonica Zebrina, (Zebra Grass,) bright green blades with white bars Grows to a them. height of five to six feet, producing fine lace - like plumes which will last for years if cut when fresh. Perfect hardy. 15 ets.

Eulalia Japonioa Varie-

gata, a variegated herdy grass from Japan. In appearance it somewhat resembles the Ribbon grass, while in a young state. It forms compact clumps, six feet in diameter; its flower stalks are very graceful and numerons, 25 ets.

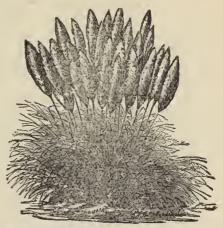

Eulalia Univittatæ, very hardy and graceful, with elegant little plumes, 2 to 3 feet. 15 ets, Auroa Linearis, foliage beautifully lined with gold; of compact and dwarf habit, 50 ets.

Gynerium Roseum, practically the same as above, but with rose colored plumes, 50 cts.

Gynerium Elegans, plumes silvery white, produced upon very long stems: blooms early; a graceful new variety. 50 cts.

Gy. Purpureum or Purple Colored, of very robust habit, producing plumes of great length and substance; of a light purple tint. 50 cts.

Gy. Roi des Roses, plumes very compact, of a delicate rose color; very fine blooming and compact growing, new variety, 50 cts.

Gynerium Argenteum, (Pampas Grass,) "enormous bunches of long, handsome, dark green blades, producing long stalks of silver-white plumes; 5 to 6 feet, 50 cts.

Eriantus Ravenna, (Mock Paurpas,) the plumes last outdoors for several months, and are borne profusely: 8 to 10 feet. 15 ets.

Lemon Grass, came from Malabar, where, as in many other parts of the world, the tea made from it is a favorite beverage. A delightful perfume is extracted from the leaves. Highly valued for its medicinal properties and sweet fragrance. Large clumps, 25 etc.

Texas Blue Grass, this is one of the hardiest and best winter grasses for our climate, it is also a good lawn grass. I large packet seed, 25 ets. 100 plants, 25 ets.

Dry, divided roots, the best to transplant, 20 cents each; \$2 per 12. One each of the 20 varieties for \$3.

This magnificent new race of Cannas is the sensation of the century in floral novelties, in size, brilliancy of flowers and majestic musa-like foliage: they commence to flower in a very short time after planting, and are a mass of gorgeous colors until stopped by frost in fall. At the low price that these showey plants are now offered, no one, who has a lawn or yard, should be without a bed of these beautiful free blooming Cannas.

The following 20 sorts are the best collection that can be made.

Alphense Bouvier, crimson. Charles Henderson, red. Egendale, cherry red. F. Newessel. Maurice Rivoire.

Alsace, light yellow.

Antoine Crozy, searlet and yellow. Florence Vaughan, bright scarlet. Golden Star, yellow.

J. D. Cabos, rich apricot yellow.

Geoffrey St. Hillaire, searlet and orange. J. C. Vaughan, vermillion orange.

Maurice Mussy.

Mad. Crozy, crimson, bordered golden yellow. Mad. Montefiore.

Nelly Bowden.

Paul Bruant, orange scarlet.

Princess Brancovan, red, edged golden brown. Queen Charlotte, orange scarlet, edged yellow. Souvenir d'Antoine Crozy, scarlet crimson, bordered with golden yellow.

### Gladiolus.

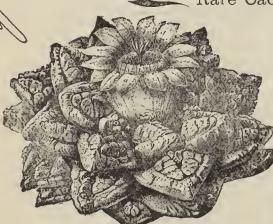

Butbs, extra targe, 1½ to 2 inches in diameter of the finest varieties that money can buy, 5 cents each; 50 cts, per 12; \$3 per 100.

The GLADIOLUS is the most satisfactory and most popular of all garden bulbs. Nothing else of the kind costs so little, and grows and blooms so readily in any soil or climate. It is the most satisfactory garden flower, thriving and blooming as it does, with least care and attention, and makes a display, which for brilliancy and beauty of coloring, few bulbs can equal. The Gladiolus is to the flower garden what bread is to men.

Plant at any time from March to June, in any fairly good soil, welf spaded. Plant in full sun and keep down weeds, Try a hundred of my extra large and extra fine bulbs, and have the grandest flower you ever saw of all colors, yellow, crimson, buff, salmon, lemon, pink,

rose, white, cherry, marcon, searlet, and in fact all odd marked sorts that one can think of.

The wonder of Wonders in the Plant Kingdom, watering: flowers white and open at night. Natures Living Picture of Intricate Carved Price, 75 ets. to \$2. Stone Work, Will Live and Bloom for Years without being Planted or Watered, Called by inches high, 4 to 6 inches in diameter, very the Indians "The Star Rock" and "Dry Whis- dark green, with numerous flowers; spines key" being somewhat noted as an intoxicant. brownish, less than an inch long, flowers abun-This rare and marvelous plant is found on the dant I to 14 inches long, pale rose with a darktop of arid, barren, rocky, limestone mountains, er colored mid-rib on each petal. 35 cts. to\$1. at great altitudes, in Mexico, where it is too

trunk or room, or wherever it may be, The flower is very beautiful, being one inch long and of the same diameter. Price 35 ets.

Anhalenium Williamsii, this Cacti should be in every collection: shape like a carrot,  $2\frac{1}{2}$  inches in diameter at the top, 6 to 8 inches in length, dark glaucous green, without any spines; the plant produces little offsets and grows into fine large clusters; flowers, pale rose, Single plants, 20 cts; clusters, 50 cts.

Cereus Greggi, a very rare Cereus, probably not a single specimen being in possession of any dealer in the United States. The roots resemble an enormous

by its beautiful gray color. Price for large low, exceedingly large and attractive. Plant plants, 50 ets. to \$1.50.

Echinocactus Intertextus, a neat small growing plant, seldom over 4 inches high. Spines purple with pale margins, 35 to 75 cts, each,

Echinocactus Longihamatus, globular, dark rich green, with large prominent ribs, usually 13, radial spines 4 to 4 inches in length, called flowers uncasuring  $2\frac{1}{2}$  to  $3\frac{1}{2}$  inches; externally make it very attractive. 15 to 35 cts. greenish-yellow and red; internally, yellow with a red base, It is our choice, 50 cts, to \$2

Echinocactus Texensis, "Devils Pin Cushion" globular when young, when old, depressed, a-yellow, with exterior sepals reddish green, bout 12 inches in diameter, and from 4 to 5 interior ones yellow, with a dark mid-rib. Peinches high. A very attractive plant with its tals of a beautsful sulphur yellow: a neat plant rosy red spines: flowers, very large, yellowish and a low price. 25 to 50 cts, each, rose and beautifully fringed; followed by large seed-pods, that are extremely ornamental, and tus is always admired for its bright silvery which remain for several months in a bright spines, which radiate in the sun. It forms line red color, 35 cts, to \$1, according to size,

Echinocereus Enneacanthus, stems branching. gray: large reddish purple flowers, fragrant, 3-lowed by searlet, club-shaped berries which replant and a free bloomer. Single heads, 2) to 50 cents.

colored flowers, 35 cts, to \$1,

Echinocereus Stramineus, a most remarkable plant, 25 to 50 cts. each. plant, one plant often consisting of from 100 to 200 heads, which are covered and defended plant attract as much attention as this. It is by the very long, flexous, straw colored spines, always a beautiful evergreen. It stands great Single heads, 5 to 9 inches high, 2 to 3 inches extremities of heat and cold, and a years in diameter; petals of a bright purple or deep drouth as it does in its native country. The pink color, inclining to crimson. Fruit purple, delicate serrnlated leaves, varying from 100 to of a delicions taste, intermediate between a strawberry and gooseberry, 50 cts. to \$1.

make such a fine show as this one in early spring, when covered with from 20 to 40 bright red berries, which appear between each tubermaking it doubly attractive. The plant is globose, depressed in the center, 3 to 5 inches in diameter and as symmetrical in shape as a ro- and baskets. 20 ets. sette, tubercles quadrangular, white spines, short and rigid. 20 to 50 ets.

Mamillaria Echinus, a very striking plant. Send me the name of the Cacti wanted. Radial spines white, interlacing. Flowers yel-

globular, 13 to 2 inches in diameter: very desirable, 25 to 50 ets, each,

Mamillaria Micromeris, this is called the nicely arranged and very regular, almost pure "Button Cactus;" the beautiful little plant white: flowers long and wide: sepals dark being completely covered with a delicate lacework of ashey gray spines. It is the smallest known species of Caeti; fully grown plants only measuring from 1 to 1 inch in diameter and 1 to 2 inches in height. Flowers, whitish fishhooks. The plant grows to a heighth of two-or very light pink, followed by bright carmine feet, but flowers when only 2 inches high, berries, which remain on it all winter and

> Mamillaria Pectinata, a small, beautiful. globe-shaped plant, with small, white, rigid spines; bears larger flowers than the plant,

Mamillaria Pusilla, this beautiful little Cacclusters in comparatively short time, and consequently can be readily propagated; flowers often growing in dense clusters of a hundred yellowish white, with a red stripe through flowers or more: Iresh green, spines few, ashy center of petal, and produced in profusion, folinches in diameter. This is a most attractive main on the plant until next season. 15 to 25 cents each.

Mamillaria Tuberculosa, a pretty and well Echinocereus Paucispinus, stems 5 to 9 inches delined species from the mountains. Stems high, 2 to 4 inches in diameter; ribs few; grow in clusters, 2 to 3 inches high. Flowers: groves shallow; spines few, and very fine dark pale purple and about 1 inch in diameter; berry oval elongated, red and odd sort. Single

Easylirion Serrulata, rarely, if ever does any 200 in number, are 2 to 3 feet long and 4 inch wide. The enormous flower spikes rise to 10 to Mamillaria Applanata, few Mamillarias will 12 feet in higth. This is acknowledged as the most durable and useful of all decoration plants. 75 cents to \$1,50 each.

Agave Lecheguilla. a plant of many stems; cle. It flowers also at about the same time, bright green on the outside and pale green on the inside. It is the "Ixle Plant" from the 4iber of which the Mexicans make ropes, bags

> We can supply any known Cacti at a much cheaper price than Dealers will charge you.

Send your orders direct to the Nursery and you will get much better trees and plants, and save  $\frac{1}{3}$  to  $\frac{1}{2}$  of your money. My stock is much larger and plants are in a better condition, than they we follow last year. "The Rolling Thing Before the Whirlwind,"

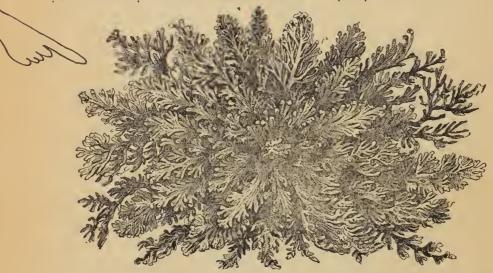

# The RESURRECTION PLANT, Mentioned by Isaiah in the Bible.

This Shrunken, Rounded Ball of Tightly-Coiled-Up Leaflets, Dry and apparently Dead, will live for hundreds of years without being planted or watered. When immersed in tepid water one frond-like tip unfolds slowly ontward, then another, and another, until in a short time the whole plant has resurrected, flattened out into a plate-like shape, and is transformed into a Lovely Rosette of beautiful velvet green, fern-like moss, both odd and marvelous.

It will grow nicely if planted in a warm, moist, shady place, but being nearly or fully matured in size and growth when gathered, it need not be planted at all, as the plant will keep just as well in a trunk, or any other

dry place in the house, for ages, in a perfectly tresh and healthy condition, and can be resurrected at will time and again, indefinitely, by being allowed to curl up and become dry, each time, after having been fully opened out by water.

The first picture is a photograph of the apparently dead plant (reduced in size), the inside fronds of which are rolled up like a scroll; the color is somewhat like that of iron rust, having a much more dead appearance than old dry hay, and like bay, it is not affected in the least by any extreme of cold or heat.

The most remarkable peculiarity of this plant is, that after being BOILED, it is still so sensitive to humidity that it will curl up and unfold in the same manner as when growing in its native soil.

It is entirely distinct from a small "Selagiuella" grown in Mexico, incorrectly called the "Resurrection Plant."

It is one of the greatest of wonders in the plant kingdom; a rare and beautiful thing in the parlor in the dead of Winter, and a most interesting curiosity to all at all times. 15 cents each; 2 for 25 cents.

I also have a Resurrection Moss, 25 cents each; and three kinds of Resurvection Ferns, 15 cents each; which, when dry, curl up and are apparatly dead like the Resurrection Plant, and like it can be resurrected at will, indefinitely.

he Resurrection Plant, and like it can be resurrected at will, indentitely.

### Bitte folgendes genan durchzulesen.

Befondere Aufmerksamkeit wird Anftragen von . Go ift mein eigenes Intereffe meinen Aunden nur bentiden Runden gute, namengadte Sadien an fenden und pur folde

Alle meine Baume find obne Bewässerung gezogen und besonders für unser trockenes, heißes Alima geeignet. Ich bezahle feine Transport- Kosten, lege aber immer so viel gratis bei um die Rosien zu decken.

Der volle Vetrag nuß bei jeder Vestellung beitiegen. Es werden keine Zachen C. O. D. versandt. Bestellungen unter \$2 werden uicht angenommen, außer es werden 25 Cents für Verpackungs Kohen mitgesandt.

Gelder follten immer per Money Order oder regiftrirten Briefen gesandt werden. Bei fleinen Emminen werden auch 2 Cento I oftwarfen augenommen.

Nach diesen Natalog Preisen werden die Bäume und Pfianzen sorgfältig in Moos und Stroh verpackt und an biesige Transvort-Gesellschaft abgeliesert, doch nachdem die Sachen aus meinen Händen gegangen sind, bort meine Verantwortlichkeit auf, anger wenn durch mich Irthümer gemacht wurden, was aber innerhalb Jagen nach Empfang der Sachen berichtet werden und.

Man sei sa recht vorsichtig beim Anspacten der Bäume und schlage die Wurzeln sogleich in senchter Erde ein; erlande ja nicht daß die Wurzeln austrocknen können.

Ge in immer besser Banne bei Expres kommen gu laffen, außer fie find schwer und die Entferung ift nicht weit, dann können fie auch bei Aradu gesandt werben.

Wenn (Seld genug mitgesandt wird, so werde ich die Expreß Kosten bezahlen, da ich billigere Katen bekomme, so kann ich meinen Kunden dadurch (Seld ersparen, doch kann keiner verlangen daß ich die Kosten ans meiner Zasche bezahle. Sollte zu viel (Seld gesandt werden, io wird das übrige sogleich returnirt.

Man vergesse nicht die genaue Adresse auzugeben, und auch wohin die Sachen gesandt werden sollen, dieses verweidet manchen Irrthum. . Es in mein eigenes Jutereffe meinen Annden nur gute, namensächte Zachen zu senden und nur solche Bamme und Pflauzen mit welchen sie Erfolg haben werden; aber ich kann nicht verantwortlich gemacht werden sier zu große Türre, strenge Winter, frühe oder späte Aröste, oder für Sasen und Inseten Zchaden und bin nicht verantwortlich für Bämme und Pflauzen, welche in anderen Sänden abserben.

Ich engagire keine reisende Banmagenten. Auch habe ich keine T bitbänme welche \$1.50 bis \$2.50 per Etnik koften und sich später als Hunbug answeisen, noch habe ich Banm: Weintranben, Brommbeeren, Simbeeren oder Erdbeeren, auch keinen nie seklichlagenden Mandel oder anderen Sbitbann. Diese Bunder Ban me und Pflaugen überlasse ich geine den zungengewandten Banmagenten, sur welche sie passend sind.

### Achtung.

Alle diejenigen, welche große Anpflanzungen zu ma den gedeufen und Läume, Pflanzen oder Rosen in großen Quantitäten gebranden, sollten um meine Engros, Preise schreiben, da ich Läume in großen Quantitäten billiger Fracht frei nach irgend einer Station in Zexas liefern kann, als irgend eine andere Laumschnle.

Aur größere Anpflanzungen für Mirchen, Schulen oder Mirchböfe, gebe ich einen großen Rabatt, da ich für diese Zwecke einen großen Vorrath an Bäumen, Rosen und immergrünen Sträuchern habe.

Sollten irgend welche Sorten Ränne, Pflanzen oder Saamen gewünscht werden, die nicht im Katalog benannt find, so bin ich gerne bereit, selbige zu den nie drigsten Preisen zu besorgen. Da ich mit den größten Baumschulen, Moristen und Saamenhändlern in Berbindung stehe, kann ich die Saden zu speziellen Preisen bekommen.

Man adreffire alle Briefe an
